

Sulav Bhatta

Data Science Student

✉ bhatta.sulav2005@gmail.com ☎ +977 9848912635 📍 Kathmandu, Nepal

PROFESSIONAL SUMMARY

Data Science student with hands-on experience in developing full stack applications and data analysis projects. Known for creating a hotel management system and a movie recommender application, demonstrating strong programming and analytical skills. Looking to leverage my skills in data science roles that challenge my creativity and technical abilities.

EDUCATION

Bachelor of Science with Honours, Data Science
Keele University

PROJECTS

Full Stack Hotel Management System
HTML · CSS · JavaScript · Python · FastAPI · MySQL

Developed a comprehensive hotel management system for a resort in Nepal, utilizing a full stack approach with technologies such as HTML, CSS, JavaScript, Python, FastAPI, and MySQL. The system streamlined operations and improved customer experience.

Game Application
Processing · Java

Designed and developed an engaging game application using Processing and Java, showcasing skills in animation and user interaction.

Movie Recommender Application
Python · Pandas · NumPy

Created a movie recommender application that analyzes user preferences using Python, Pandas, and NumPy, providing personalized recommendations based on data analysis techniques.

SKILLS

- Python
- Data Analysis
- Machine Learning
- Matplotlib
- Seaborn
- FastAPI
- MySQL
- Java
- Processing
- Pandas
- NumPy
- scikit-learn
- Streamlit
- Reflex
- Jupyter
- Git
- Flutter
- React
